ALMON F. BURBANK,
Library Trustees.

This certifies that I have examined the above account and find the same correct and properly vouched, and a balance in the hands of the trustees of \$31.06.

MARTIN H. COCHRAN,
Auditor.

REPORT OF SCHOOL BOARD.

The object of a school report is to give the citizens of the district a true knowledge of the condition of the public schools, taken from all standpoints and to make such suggestions in regard to the future as the school board, in their judgment, deem expedient. We realize that it makes a much more pleasing report to speak only of the commendable features of our schools and pass over the rest lightly, but in order to profit by past experiences, a plain and correct statement of facts is always best.

The treasurer's report will show the condition of the finances, and the statistical table appended shows the number of weeks' school during the year, also the whole number of pupils enrolled, and other detail.

Without drawing on the imagination we think it fair to say that the schools throughout the district are improving slowly from year to year ; it is not so noticeable in one year but when we look back over a period of five years we think there is a decided improvement. Speaking of the schools generally, of course the progress is more noticeable in some schools than in others, owing to conditions that cannot be controlled under the present light. In some of the rural schools the number in attendance is so small that it is impossible to awaken the interest and enthusiasm that is manifested in the larger schools, consequently there is not so much uniformity of work as in the larger and more favored schools, but we know of no way to remedy these conditions as the small schools are so remote from each other that union is not practical.

We think our teachers without a single exception have labored hard and faithfully, and if some have not made so much perceptible progress with their schools as others it does not necessarily signify that they have been any the less efficient as they have labored under more unfavorable conditions.

To all persons who have visited the schools during the past year we deem it unnecessary to say anything about music, as we feel satisfied that if there are any who are at all skeptical in regard to the advisability of teaching music in the public schools, all they need to do is to visit the schools and listen and they will never regret the amount expended for that purpose when they see the results accomplished, and we would recommend that the district make an appropriation for the continuance of teaching music. In order to obtain the best results, organization and uniformity of system are necessary and in order to have a uniform system there must be superintendency, and we would favor the adoption of a law whereby the whole district, or several districts if necessary, might be under the supervision of one professional superintendent who should devote his whole time and energy to that work, and we believe the results would be far more satisfactory than under the present system.

J. HOWARD ROBINSON,
SARAH F. DEARBORN,
WILLIAM N. JOHNSON,
School Board of Pembroke.
